New User Onboarding: How to Use Show3?

What is Show 3?

Web3 social platform Show3 has entered the private testing phase. Welcome to join the social revolution with us! Let's have a quick look at what is Show3 first.

The show is a decentralized Web3 social platform based on DID protocol with full data on-chain and centered in NFT. One of the major differences between Show3 from Web2 social platforms is that all the data you generated and assets you own truly belong to you. Any third-party team can recover and display your data if the Show platform disappears. Data monopoly and "gatekeepers" no longer exist.

Show3 will bring you a unique Web3 social experience that other platforms cannot provide:

1. Unique Social & Mint features that help you mint and earn
2. A Supper App with comprehensive social and cross-chain features
3. A Integrated Web3 Community with powerful tools
4. Data On-chain and Independent Nodes with authentic decentralization

…

Let's start the journey!
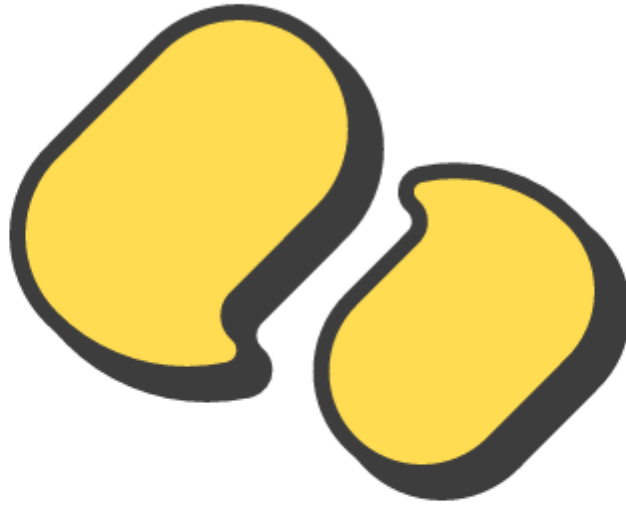

Show 3

The show is in the private beta phase. Therefore all the data is stored on testnet and will be kept in the official beta version.

1、 Connect Wallet or Create Account

Before using Show3, you need to create or have a MetaID. Follow the instruction for creating a new MetaID account to log in. We will help you generate a ShowMoney wallet address automatically.
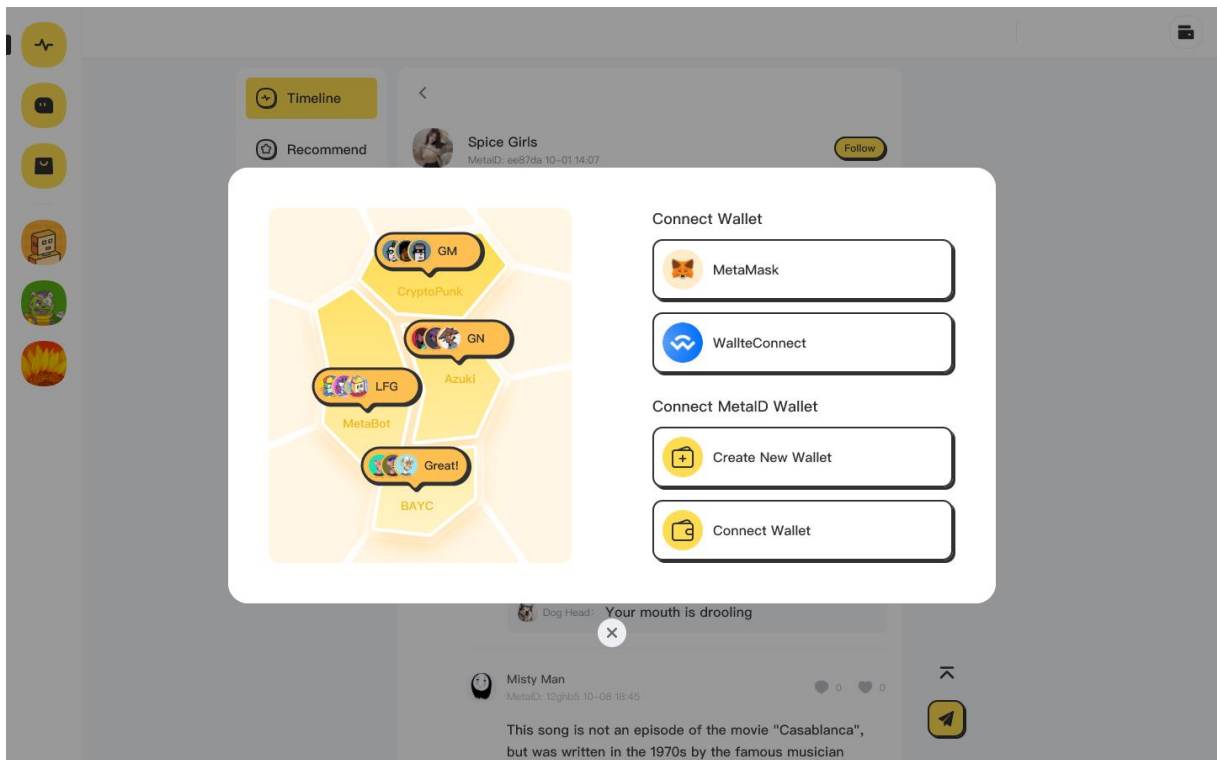

If you already are a Web3 user, you can simply connect your previous wallet like MetaMask and Wallet Connect to the system. We will help you create a new MetaID and login automatically.
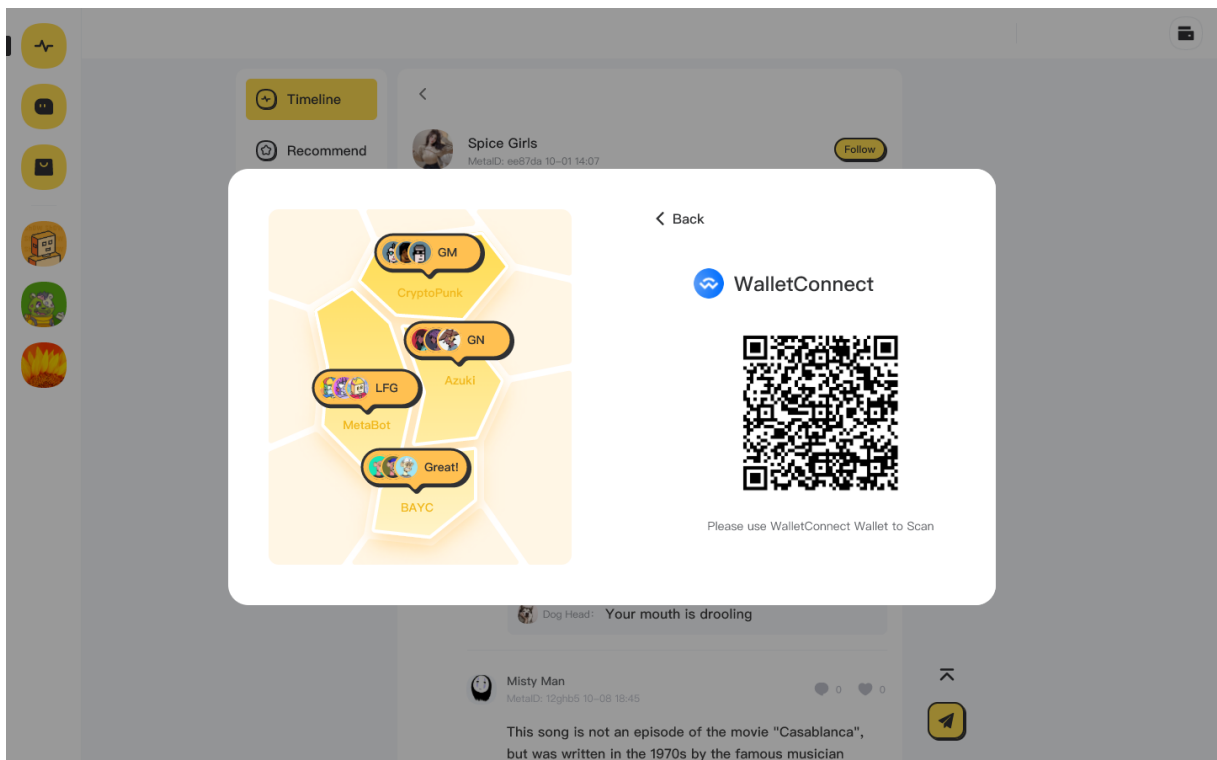

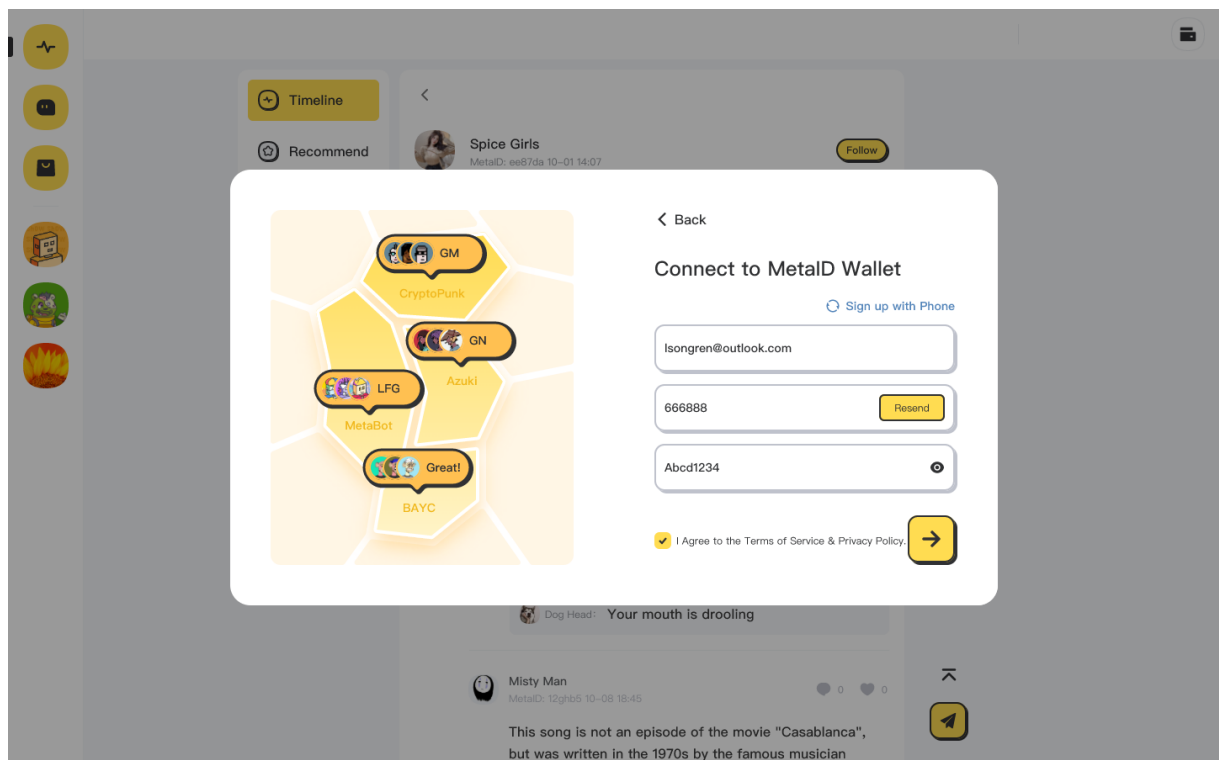

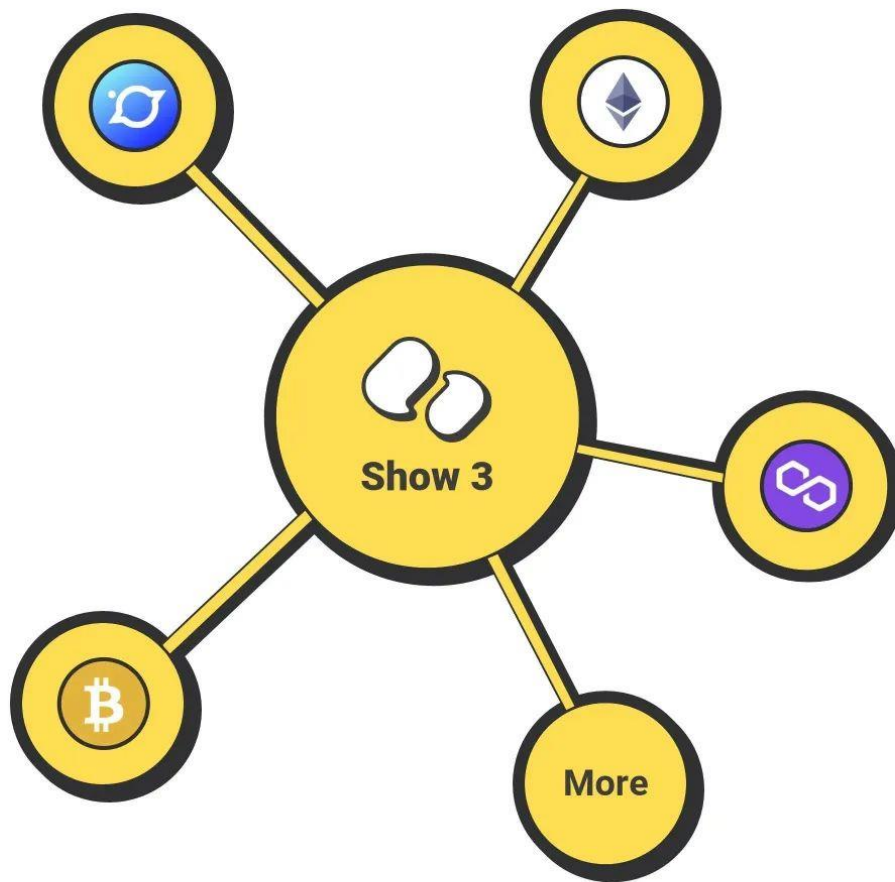

Signing in to Show3 is safe. It is used to connect your wallet to MVC (Microvisionchain) wallet or pay for ME or NFT. Please make sure to sign in to the official website,https://www.show3.io/home

2、Support Cross-chain

and Polygon. You can display and use your NFT on different blockchains on Show3. We will support more blockchains in the future.

Besides, you can set your profile picture with NFT to show your personality and OG status. In Show3, all the social elements including Usernames, Avatars, Backgrounds, Digital Pets, Emojis, etc, can be a tradable NFT. We aim to truly integrate utility NFT in every aspect of your virtual life.

3、Buzz

Show3 aims to become the most favorable Web3 platforms for billions of users to share their life. We provide Buzz as the micro-blog function to encourage everybody to speak freely without worrying about data security.

Buzz is supporting multiple contents including NFT, music, videos, files, DAO votings, Club entrance, Tradings, etc. Buzz is a world to explore with imagination.
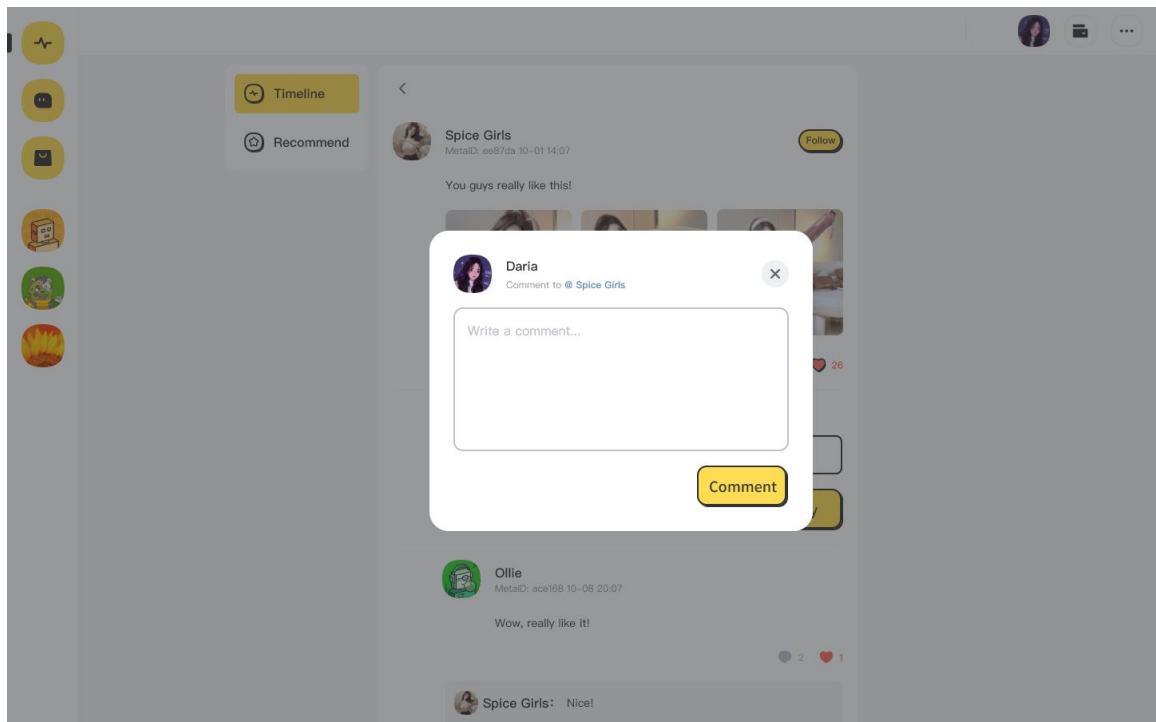

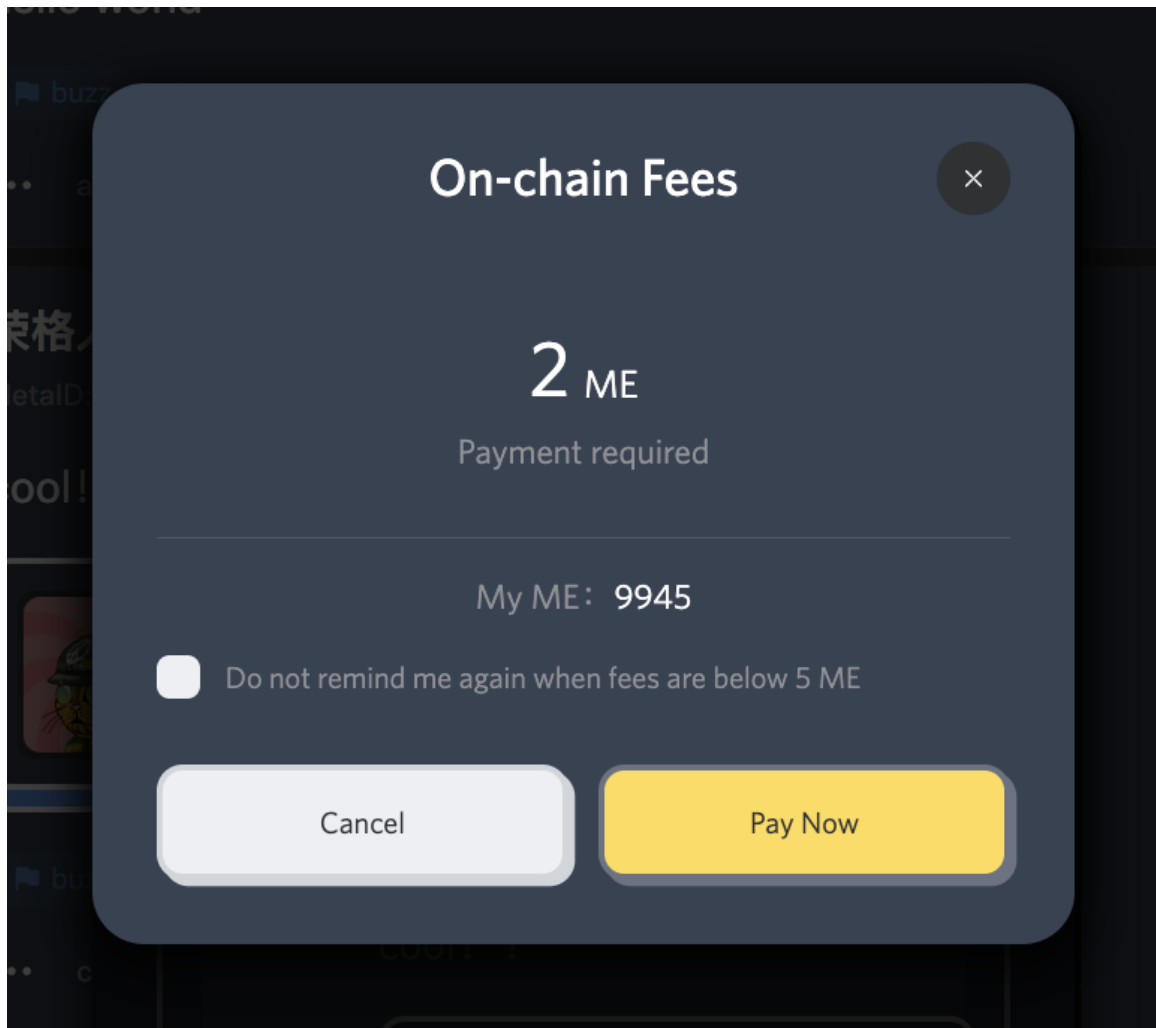

We insist on data on-chain, which is the key to true decentralization. In Buzz there are two special ways to show this feature.

1. When you post, follow and like, you will need to pay on-chain fees, ME to miners. ME (MetaEnergy) is a central point system in the Show Platform. It is not a cryptocurrency and it doesn't have a private/public sale or listing plan. It is only used within the Show platform. The show team will not hold, sell or recommend users to hold any ME.

All the new users in the Show test phase will receive 10000 ME as a reward. In the early stage we will give away free ME to all the users. With the growth of users, on-chain fees will become extremely low. That means you can upload massive data onchain with a micropayment.
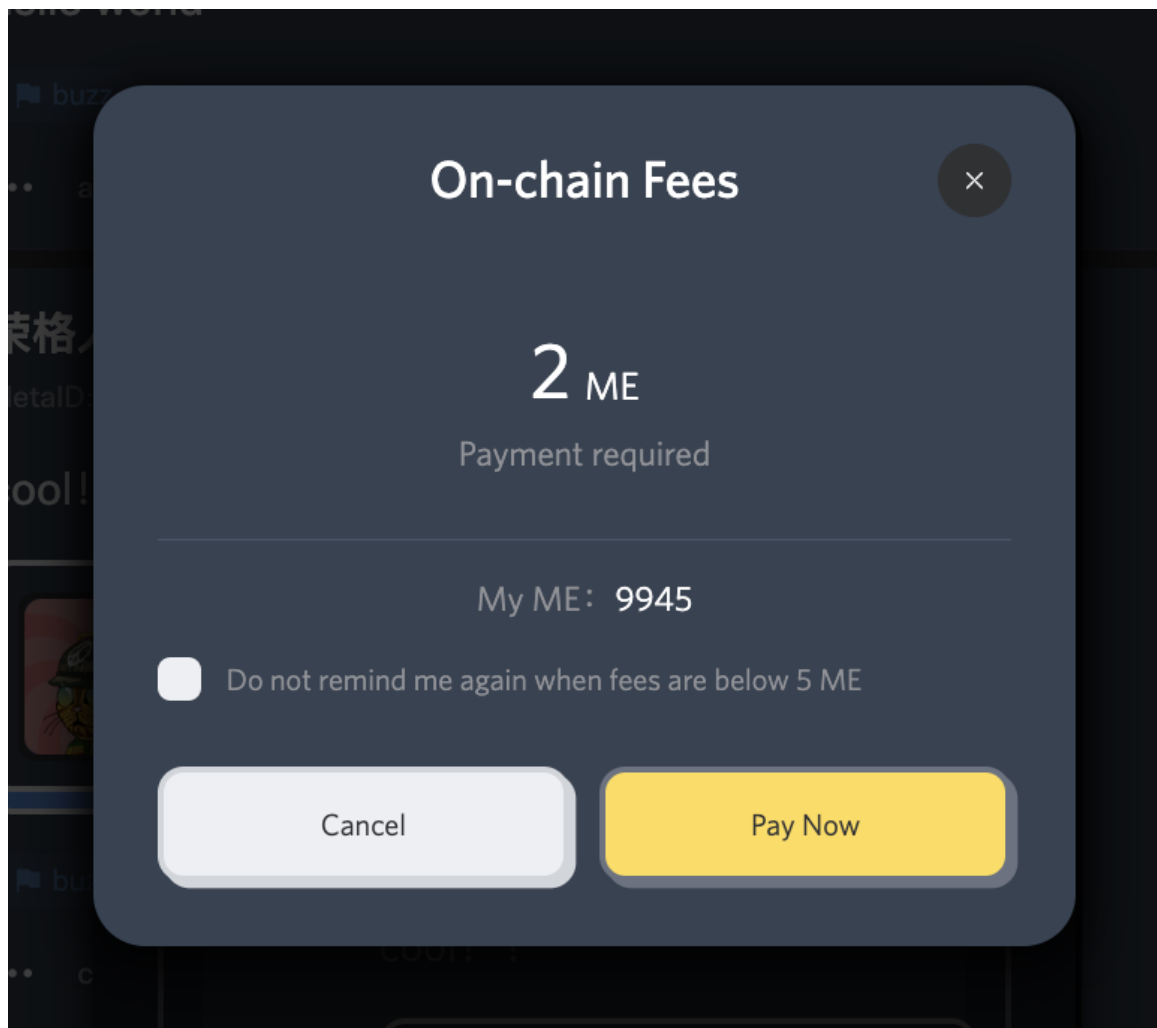

2. every time you post a Buzz, you will find a pop-up notice in the lower right corner of the page. It shows that your data is on-chain-ing. After that, you can click the TX on every post to check the on-chain information. In the future, we will provide the feature of minting your Buzz into an NFT.

On-chain Fees

2 ME

Payment required

My ME：9945

☐ Do not remind me again when fees are below 5 ME

Cancel   Pay Now

4、 Join the Club!

In Show3, we provide more powerful community features compared to other social platforms. You can try advanced features like NFT social trading (P2P), DAO voting, On-chain file sharing, and so on. Show3 is the only Web3 social platform that gives you the experience of data on-chain and 100% decentralization.

If you are a community builder, you will no longer need to jump between different applications.

Instead, you can build your community that is truly on-chain in one super App without relying on other third-party platforms.
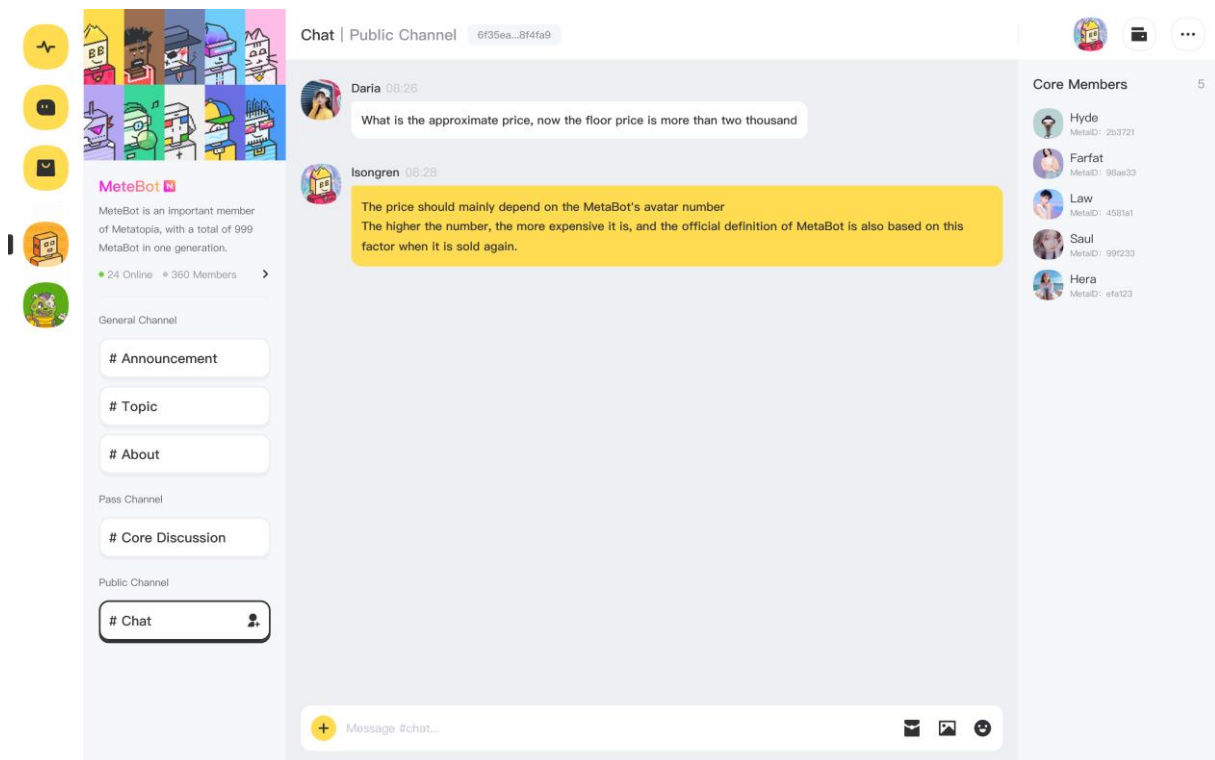

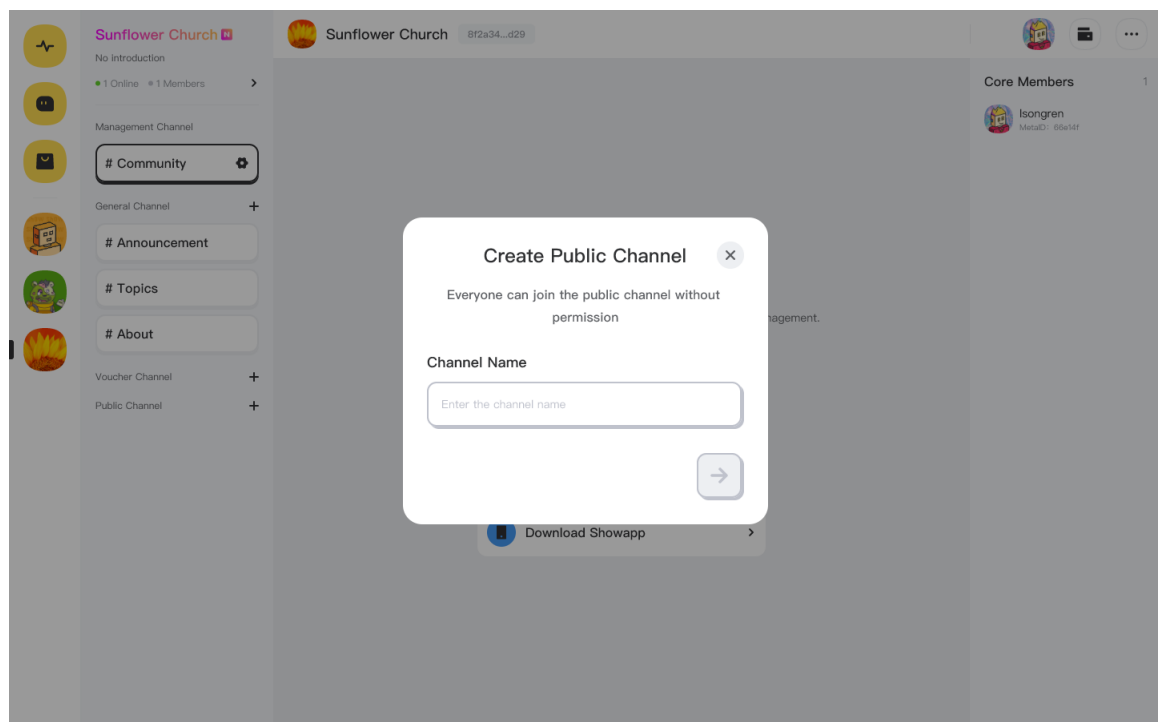

There are two kinds of Channels on Show:

● Public Channel

Club owners can create public channels in their clubs. It is a place where everyone can talk and be seen.

https://www.show3.io/talk/channels/74462f14a033849bf6067de63ad3d6c54edfa48ec1f2759
e8ed8c6165b3f58b2/ffaff2eb61f71ea7c19383938be7eb60823dc184e7e0049dc4bc0d5d0297

● Pass Channel

You can consider Pass Channel as a place to Hold Chat. But it is way more than that. The pass channel can limit members to enter with specific NFTs, tokens, and passwords. It is a feature that helps club owners to classify members and provide advanced services. It can also help ensure the authenticity of the talk.

No holding, no entering. If you sell the NFT/token, you will also quit the channel by the system. What's more, you can set a different amount of token holdings to further hierarchize your club members. Welcome to explore this feature with your creativity!

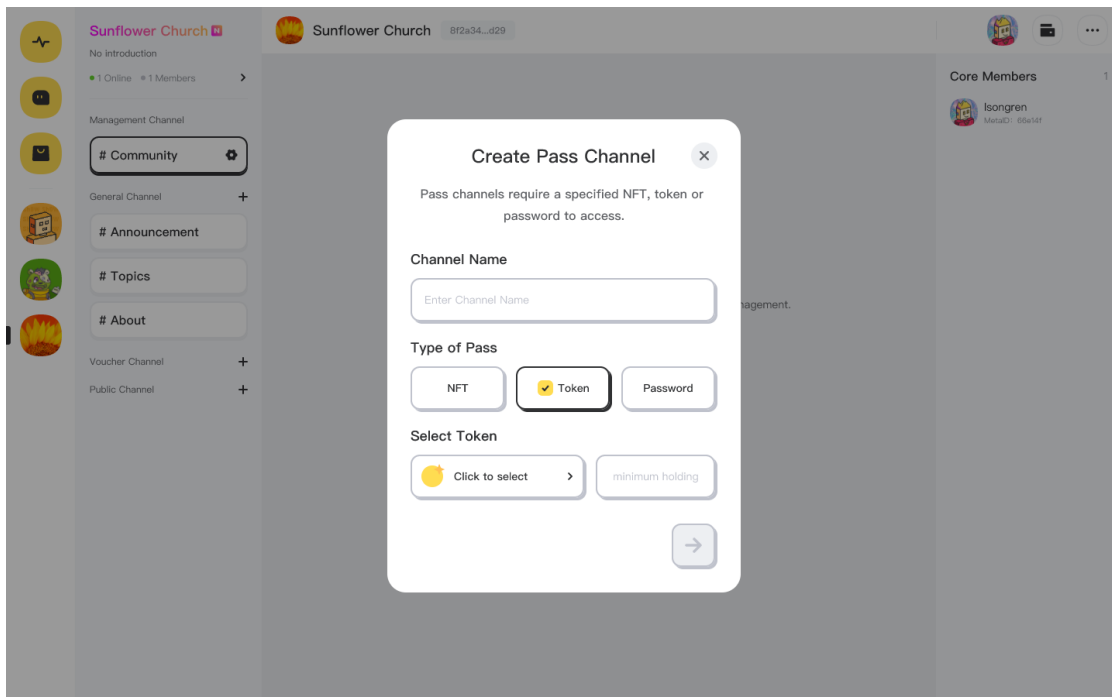

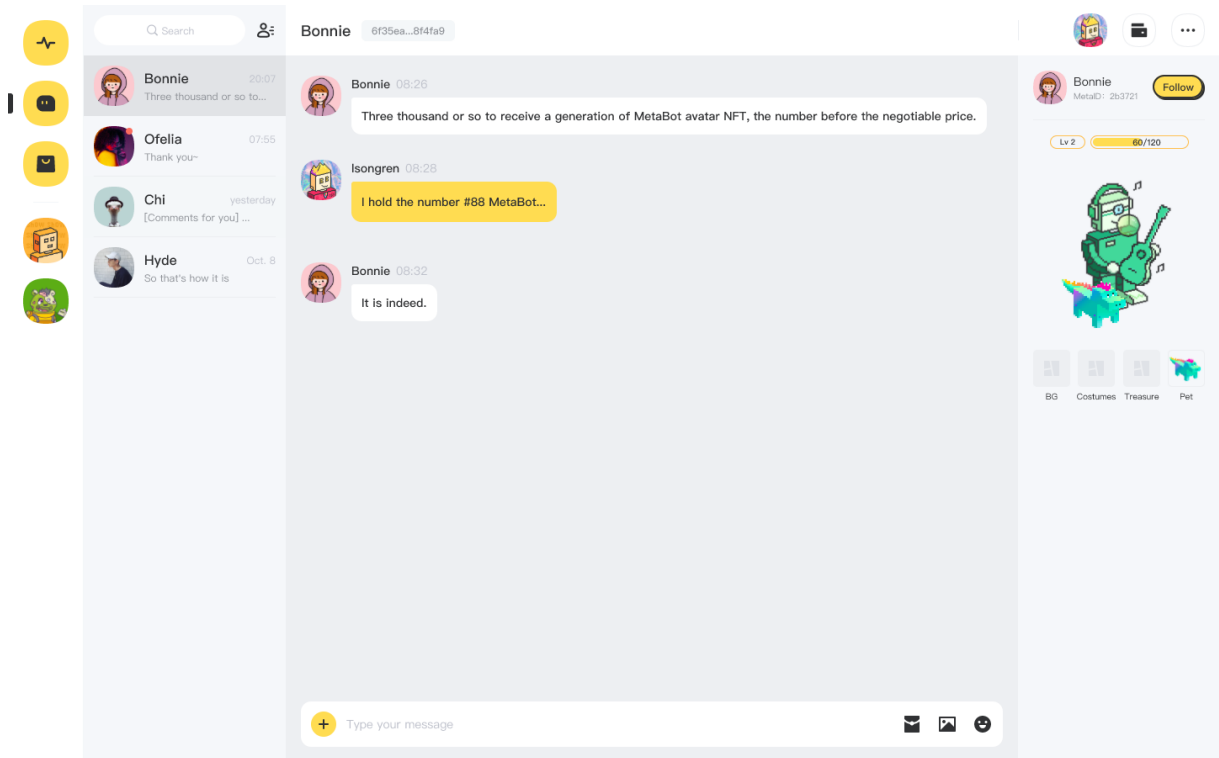

5、Private Chat

The show provides an integrated private chat system to users with innovative features.

Because we insist on data on-chain and complete decentralization. The talk between you and your Web3 buddies is only visible to you two. No one can access or even read your data, even the Show team. The chat is completely private.

Besides, You can share NFT emojis, Candy Bags, on-chain Files, and NFT trading with your friends on Show3. It can help you to build a diverse relationship on Web3.

Bonnie 08:26

Three thousand or so to receive a generation of MetaBot avatar NFT, the number before the negotiable price.

Isongren 08:28

I hold the number #88 MetaBot...

Bonnie 08:32

It is indeed.

Bonnie 20:07
Three thousand or so to....

Ofelia 07:55
Thank you~
